WHY GTB's DLP SOLUTION?

Next Generation Data Protection Patented Solution

GTB's patented fingerprint engine, an intelligent and advanced detection technology, helps to reduce the rate of inaccurate detection for users. This enables organizations to increase efficiency and spend less time checking inaccurate detection.

Optical Character Recognition (OCR) Capability

With an integrated OCR capability, sensitive data can be easily recognized even when sensitive text info were scan into images. This capability provides a more comprehensive data detection and protection for data leak through photo images.
